

MATHEMATICS ACTIVITIES

WEEK ONE

MONDAY

1. The length of a string is estimated as 0.2. Convert this length as a fraction.

2. In a grade 8 mathematics tests comprising 6 items, a learner passed in 2 items.
Express the learner's performance in decimal form.

3. Which integer can be used to represent two hundred metres above the sea level?

4. Work out: $\frac{1}{3} - \frac{2}{9} + \frac{4}{5} \times \frac{1}{8} \div \frac{1}{4}$

5. The distance between the earth and the sun is estimated to be 150 000 000 km.
Express this distance in standard form.

6. What is the ratio form of $12\frac{1}{2}\%$?
